

IBEW Local 94 Annuity Fund participants must contact NWPS by calling: 888-700-0808 for initial set up before accessing your account online.

After calling, please follow instruction below for account log-in access:

Accessing Your Retirement Plan Account

Keeping your passwords safe is an on-going challenge given the many ways that your password may accidentally be exposed, whether via a breach or via a phishing attack. Your retirement account is secured using Multi-factor Authentication (MFA) which adds a layer of security that allows us to protect against the leading cause of data breach – compromised user names and passwords.

What is Multi-Factor Authentication (MFA)? It is a security mechanism in which individuals are authenticated through more than one required security and validation procedure.

What are the requirements? Your account data must include a text enabled phone number or e-mail address. This data can be provided by your employer directly to us or you may provide to us via your initial enrollment form. If we do not have this on file for you at the time log in, you will be prompted to contact a Live Representative (888-700-0808) to authenticate your account prior to gaining access.

Is it easy to set up? Yes! Once you are logged into your account you will review/update your e-mail and text enabled phone number. You will then choose whether you'd like to receive your authentication PIN number via text or e-mail. That's it!

How do I log in? Go to www.yourplanaccess.net/nwps/. To sign into your account, you will enter your User ID, Password and select "Participant". Initially, your User ID will be your Social Security Number (SSN) and your Password will be the last four digits of your SSN. After successfully authenticating yourself using your User ID and Password, the system will generate and send you a Personal Identification Number (PIN) via a text message or e-mail (whichever you elected). You then enter that number onto the website.

One-Time PIN Required

A one-time PIN has been sent to your selected delivery method: (443)5**-***0. Retrieve your pin and enter it below.

One Time Pin:

Resend PIN (Link will be enabled in 55 seconds)

Device Registration: Do not remember this device.

Remember this device. This is my computer or mobile that I use regularly.

Note: In order to receive your One-Time PIN, it is important to update your account with any changes in your mobile phone number or e-mail. Phone number should be capable of receiving texts. Messages & Data rates may apply.

CANCEL NEXT

Is the PIN required each login? You can request that the system remember a specific computer or device, thus negating the need to enter the PIN each login. This expires every 90 days. If you try to access your account from a different computer or device the system will send you a PIN to enter before you may gain access.

Can I still use my data aggregator? Log into your aggregator site, enter your credentials and enter your PIN when you receive it. Elect “remember this device” so that the data aggregator can access your data without entering a new PIN each time. The PIN is only good for 90 days, so while MFA is compatible with most major aggregators it requires that you have a quarterly interaction with your provider to reaffirm access. There may be some aggregators that have elected not to propagate the secure PIN to your email or text. If that is the case, your account data will not be accessible to the aggregator.

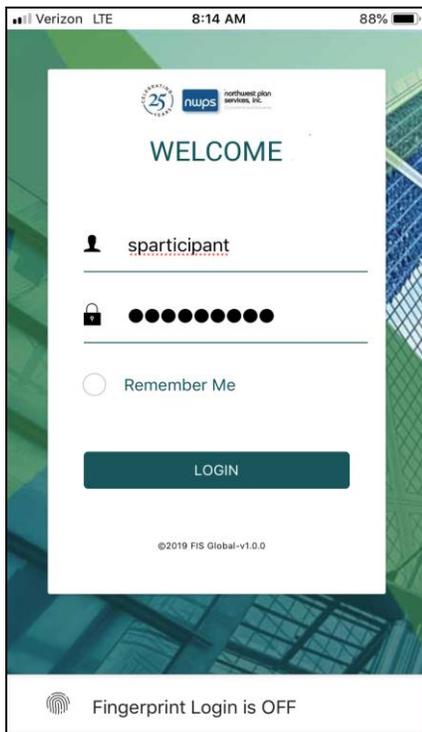

Introducing YOUR Mobile App

We are pleased to announce that we now offer a mobile app to help you keep track of your retirement plan account. The mobile app is available for both Apple and Android users.

App Name: Search the Apple or Android app store for **NWPS**, download the app and login. You will use the same login credentials you use for the retirement plan's website.

This version allows you to review your account as previewed below as well as make changes to your user ID and password. If your plan supports online changes to how much salary you are deferring, the option to make changes is available.

Login Screen

Use the same login credentials as you use on the retirement plan website.

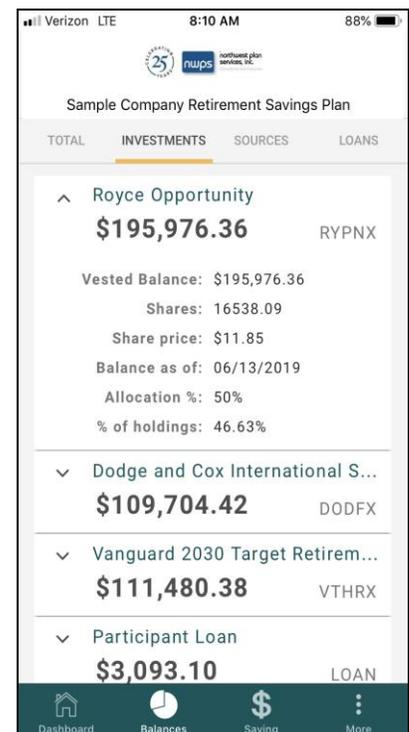

**Both are case sensitive
your phone may capitalize
your first character**

Dashboard

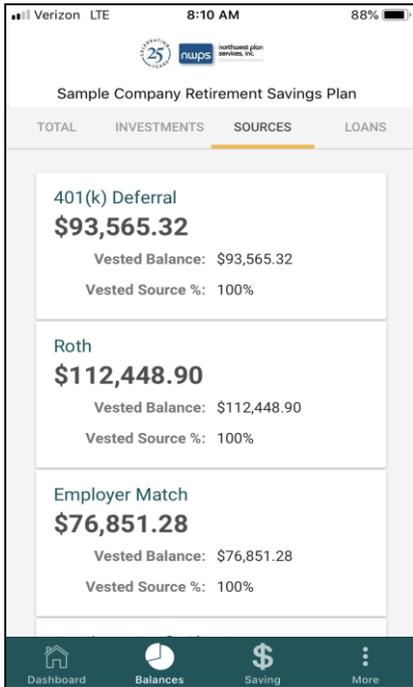

A summary of your balance, contribution elections, and personal rate of return.

Fund Information

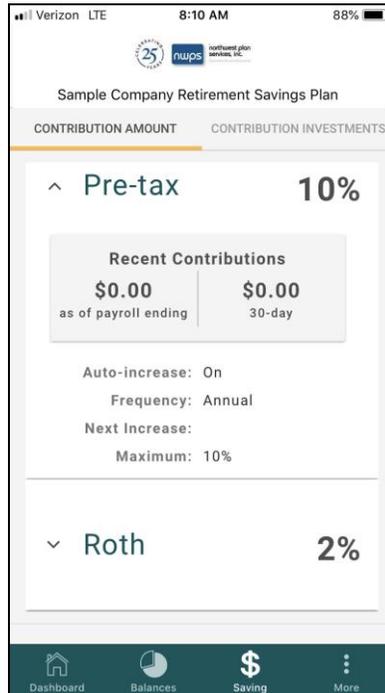

A summary of your investment options, shares owned and holdings information.

Money Type Information

Provides both your total balance and your vested balance by money type.

Contributions

Provides a summary of your recent contributions that have been withheld from your salary and invested in your account.

Investment Performance

Displays the investment performance for the investments you hold.

Contributions: If your plan has a salary deferral feature you will have a Contributions page as shown above. Some plans allow salary deferral changes to be made electronically, if your plan supports these changes the option will be available in the app.

Future Releases: There will be new options and features to the app released several times a year. The next release will allow the receipt of push notifications and changes to your investment elections. We hope you enjoy our new mobile experience!
